

Occupational Health & Safety Management Systems BS OHSAS 18001: 2007

The management of occupational health and safety is a minimum requirement in every business, but how do you know you are meeting your obligations and how do you prove it to others?

BS OHSAS 18001 is a British occupational health and safety management system. It validates companies that show excellence in health and safety performance, and demonstrates leadership in reducing risk and creating an injury-free workplace. This standard enables companies to control health and safety risks while promoting employee wellbeing and a safe working environment.

BS OHSAS 18001 does more than protect staff. Failure to manage health and safety can result in serious incidents. So as well as putting staff wellbeing at risk, businesses can risk substantial financial penalties, criminal and civil prosecution and loss of reputation.

What are the benefits?

Having your health & safety management

system independently certified by BM TRADA will reassure stakeholders that you take corporate responsibility seriously. It will:

- reduce risk of serious incidents, financial penalties, loss of reputation and potential legal costs
- demonstrate to regulators, customers and other stakeholders that the organisation is committed to best practice in health and safety management
- identify and understand legal requirements
- help deliver measurable objectives and a structured risk assessment
- reduce accidents, stress and occupational sickness

- enhance your reputation as an employer of choice
- improve staff morale and productivity.

SSIP

BM TRADA is a registered member of SSIP (Safety Schemes in Procurement). SSIP is an umbrella organisation facilitating mutual recognition of schemes such as CHAS, SAFEcontractor, Exor and Altius where practical to do so. Members of SSIP who hold a valid BS OHSAS 18001 certificate will be able to register with other health and safety pre-qualification schemes without the need to duplicate documentation, saving time and expense. Organisations certified to BS OHSAS 18001 with BM TRADA automatically gain the benefits of SSIP membership under our registration.

How to achieve certification

01 Application and review

Complete the BM TRADA request for quote form. This allows us to accurately define your scope of certification and to provide you with a quotation and a competent audit team.

02 Initial certification audit (includes two mandatory visits)

Stage 1 – this audit is to confirm your readiness for the stage 2 audit. It includes:

- review of the management system documentation
- evaluation of the location and site specific conditions
- review of the status and understanding of the requirements of the standard
- evaluation of whether internal audits and management reviews are planned and performed.

Stage 2 – this audit is to confirm that your management system fully conforms with the requirements of the BS OHSAS 18001 standard. It includes:

- evaluation of the level of implementation and effectiveness of the management system according to the requirements of the standard
- a sample audit of the processes and activities defined in the scope
- provide a written report on the audit findings and non conformances that need to be addressed.

03 Certification

On completion of step two (and closure of any identified non-conformities) certification is granted by BM TRADA. You will be issued with a certificate and certification marks to demonstrate and promote your certification.

Certification is valid for three years and is maintained through a programme of annual surveillance audits and a recertification audit in the third year before the certification expires.

Additional services include:

- Quality – ISO 9001
